PROFILE

System Engineer at In The Pocket with a strong foundation in networking, monitoring, Linux, Windows and cybersecurity. I focus on automation, Infrastructure as Code and cloud cost observability, and enjoy building reliable systems that manage themselves as much as possible.

EXPERIENCE

System Engineer · In The Pocket Sep 2024 — Present
Automation and cloud infrastructure using Infrastructure as Code. Working on cloud cost observability and built an application for CIAM (Customer Identity & Access Management).

IT Intern · In The Pocket Feb 2024 — May 2024
Internship within the infrastructure team, focused on automation and systems administration.

IT Team Lead & Student · VIC Lab 2022 — 2024
Server maintenance and network management; improved system redundancy. In my second year I became IT Team Lead, managing and mentoring a team of students.

EDUCATION

System & Network Administration · HOGENT 2021 — 2024

Economics – Mathematics · Sint-Bavohumaniora Gent 2015 — 2021

SKILLS

- Infrastructure as Code
- Automation
- Cloud cost observability
- Monitoring & Alerting
- Scripting
- Server hardening
- Server maintenance
- Networking
- Virtual networking
- Cybersecurity
- CIAM
